PICOWORLD '16

PREMIUM INSIDE >

Marc Rostalski
Passionate purchaser

Dear customers,

PromotionTops is one of Europe's leading catalogue offering promotional products, and we stand behind it. Among others, our product range includes a large selection of attractive and innovative smartphone accessories.

As a product manager with years of experience, I anticipate the newest trends. Mobile technology surrounds us more and more in everyday life and, as this catalogue proves, we are making it easier for you.

Ultimately, the truth is that not only your logo counts, but also the stylish looks, plus sensible functionality of the item. In order for the products with your logo to be maximally useful, we work very closely with our suppliers. Controls and continuous improvements are the building basis for the best possible quality.

Let yourself be inspired by our wide selection of smartphone-friendly products. With us you will find the favourites that fit your advertising budget!

Wishing you an enjoyable browse through,
Marc Rostalski

INDEX

DEKRA seal stands for safety you can trust.

Quality is our priority. Printing house in Poland holds the ISO certificate of quality: PN-EN ISO 9001:2009

PRINTING TECHNIQUES:

Laser engraving

A computer controlled process ensures a pinpoint reproduction. The final result is always dependent on the material surface. A colour replica is not possible.

Direct print

Single drops of ink are fired through nozzles directly onto the item or paper. Normally, colours that dry with UV light are used for high brilliance. Suitable for flat items.

Tampon print

A template of the logo is made and filled with the desired colour of ink. Then the colour is transferred directly onto the article with a silicone pad. As this pad is made of flexible silicone, almost all surfaces can be printed.

Transfer

A heat press, consisting of a heating plate and base plate, is used to apply the logo/ picture/ text, pre-printed on thermal paper, onto the item. Beforehand, the thermal paper is imprinted through silkscreen or digital print.

+ silkscreen transfer

The thermal paper is imprinted through silkscreen. This popular technique enables to print maximum 10 colours.

+ sublimation transfer

Digital technique. Photorealistic designs and tone gradients possible on white polyester materials. The ink penetrates the fabric and does not form an explicit ink layer on the material.

+ digital transfer

Digital technique. Easy to obtain photorealistic designs and tone gradients, regardless of the colour of the surface. A special thermo-paper is imprinted digitally and cut to size.

ENDURANCE

Powerbank "Endurance" – the perfect energy backup on the go: suitable for smartphones, iPhones, and USB devices, incl. USB cable with Micro-USB connector (length: approx. 25 cm), red charge control LED, blue operation indicator LED, on-off switch, input power: 5V, charge time: approximately 4 hours, capacity 2200 mAh, high-performance lithium-ion battery, elegant metal housing.
